REASONS FOR ALLOWANCE

Claims 1-5, 8, 10, 12-19, 21, 23, 25-26, 30-33, 35-39 and 41 are allowed over the prior art of record.

The following is a statement of reasons for the indication of allowable subject matter:

In interpreting the claims in light of the specification and applicant's Amendment and Remarks filed 05/01/2006. Examiner finds the claimed invention is patentably distinct from the prior art of record.

The prior arts of record, Ball, Chen and Clark, disclosed a method for monitoring changes in a document stored on the World Wide Web, wherein copying an original document selected by a user from the World Wide Web to create a copied document on a server separate from the World Wide Web and under independent control; monitoring for changes in the original document and archiving, in associates with Chen's method of web archive machine into Clark's electronic book over a network.

The prior art of record, Ball, Chen and Clark, fail to anticipate or render Applicant's particular feature that allows the database stores a copy of the web site as cited in a manuscript by the author of the manuscript and stores a distinctive key associated with the copy of the web site at the time the web site being reference (i.e. a verbatim to the web site as on the internet at the time of referencing); allows the author lists in the manuscript the distinctive key on a manuscript that presented to the audience together with the distinctive key from the manuscript; and upon the audience requested a particular bibliography, the database transmits a copy of the stored copy of the web site to the audience in according with the distinctive key (and, as a result,

Art Unit: 2176

the audience obtains a copy of the web site as the web site stood on the Internet at the time the author cited the web site in the manuscript).

The dependent claims, being further limiting to the independent claims, definite and enabled by the Specification are also allowed.
